**ADESTA COMPLETES FIBER OPTIC INFRASTRUCTURE FOR  
COLORADO SPRINGS SCHOOL DISTRICT #11**

*Adesta is on a mission to better the quality of American education by alleviating barriers between urban and rural technology.*

**OMAHA, Neb.**, (May 28, 2008) – Adesta, LLC, a systems integrator and project management company for communication networks and electronic security systems, has completed a \$2.86 million fiber optic infrastructure project to sixty one district schools and school facilities in Colorado Springs, Colorado. The district's network will deploy new, dedicated, fiber optic laterals, connected directly to the City of Colorado Springs fiber optic network. These connections will provide the district with reliable, dedicated, high-capacity connections to all their facilities, while leveraging existing, city-owned backbone infrastructure.

Now complete, the network provides enhanced educational services and equal educational access for district students. Interaction in an efficient and cost-effective manner will be possible for students physically separated by location. Advanced services enabled by the network include distance learning, video conferencing, high-speed Internet access, telephone voice services and data services.

"Adesta is proud to be a key player in building advanced telecommunications networks for the educational market," said Bob Sommerfeld, President of Adesta. "The district's network will allow them to easily expand services to their facilities as they continue to grow."

- more -

"Making sure our district has access to advanced services is critical to educating our youth for the 21<sup>st</sup> Century," said Terry Bishop, Superintendent, Colorado Springs School District #11. "We have appreciated Adesta's attention to safety and their commitment to providing our network on time and on budget."

### **About Adesta, LLC**

Adesta is a systems integrator that brings innovative, flexible and cost efficient thinking to the design, construction and maintenance of stand-alone or integrated communication networks and electronic security systems. For nearly two decades, Adesta has offered commercial, industrial and governmental clients an efficient single point of contact for all their project issues. A trusted partner to customers and suppliers around the world, Adesta takes great pride in delivering outstanding technology and superior service.

Adesta has deployed over 2 million fiber miles in more than 140 metropolitan and rural areas and completed over 800 electronic security systems in the United States, Europe, Asia, Central America and the Middle East.

Headquartered in Omaha, Nebraska, Adesta is managed by executives from the telecommunications, construction and security industries. For more information, visit the company's website at [www.adeTAGroup.com](http://www.adeTAGroup.com) or call (866) 221-5641.
